NATIONAL BLUE ALERT NETWORK 2018 - SHOT IN THE LINE OF DUTY

NATIONAL BLUE ALERT NETWORK

In 2015, Congress passed the Rafael Ramos and Wenjian Liu National Blue Alert Act, named in honor of two New York City police officers killed in an ambush attack on December 20, 2014. The Act directs the Department of Justice to establish a voluntary nationwide system to give authorities an early warning of threats against law enforcement officers and to aid in the apprehension of suspects who have killed or seriously injured an officer. In 2016, the COPS Office was given the honor of implementing the Act and established the National Blue Alert Network.

The National Blue Alert Network seeks to encourage, enhance, and integrate Blue Alert plans throughout the United States. Blue Alerts provide for rapid dissemination of information to law enforcement agencies, media, and the public to aid in the apprehension of offenders who have killed, seriously injured, or pose an imminent and credible threat to law enforcement. Blue Alerts can be transmitted via wireless devices and through the Emergency Alert System (EAS) in the same manner as AMBER Alerts. The National Blue Alert Network is administered by the COPS Office.

TRACKING OFFICER SHOOTINGS

The COPS Office utilizes DOJ Libraries verified news reporting services to monitor and track shootings of law enforcement officers in the United States and its territories - specifically, shootings of on-duty officers resulting in an officer being wounded or killed. The purpose is to better understand the nature and frequency of incidents that could give rise to the issuance of a Blue Alert. These types of felonious attacks account for nearly all situations where a Blue Alert would most likely be utilized. Tracking data does not include assaults by means other than firearms due to inconsistent availability of data.
